Instruction and Specification

Sheet

Electronic Gong Bell (Model - EGB)

1. LED Indication

2. Speaker

3. Input: 220V 50Hz
Single Phase AC Supply

Operation: Plug in 220V 50Hz Single Phase AC Supply to point no. 3, as indicated in above figure. The Bell will start ringing till supply is ON. Blinking LED will indicate the ringing.

Technical Specification:

Input Voltage: 220V 50 Hz Single phase AC Supply.

Running Current: 220mA

Wattage: 50 Watt

Maximum Run Time: It's a electronic product, so no limitation of ringing duration.

Volume Setting: By default the volume is set at 75% level, however volume is user adjustable. There is a volume control knob on the mother board named as VR4, varying it clockwise using a small screwdriver will increase the volume and vice versa will decrease the volume.

Dimensions: 117mm X 185mm X 102mm

Cabinet: Fabricated with metal sheet of 20 gauge and power coated with grey color.

Caution:

1. Electronic product, keep away from water and direct sunlight.
2. Don't face the speaker towards wall, minimum 2 feet distance from the wall.
3. Loud sound, install at minimum 7 feet above the ground.
4. Keep away from kids.
